This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Devono essere implementati i seguenti controlli:

- Controlli amministrativi e tecnici degli accessi: fondamentale implementare immediatamente il principio del Privilegio Minimo (Least Privilege) e la Separazione dei Compiti (Separation of Duties). L'azienda è attualmente esposta a gravi violazioni di conformità in quanto tutti i dipendenti attualmente hanno accesso ai dati sensibili (PII/SPII) e ai dati delle carte di credito.
- Crittografia: per essere conformi ai requisiti PCI DSS la crittografia dei dati deve essere implementata anche per proteggere la riservatezza delle informazioni finanziarie dei clienti.

- Business Continuity e Backup: è necessario stabilire piani di disaster recovery e implementare backup regolari dei dati critici per risolvere l'impatto di un'eventuale perdita di dati
- Gestione Password e IDS: aggiornare la policy delle password per renderla più rigorosa e adottare un sistema di gestione centralizzato (Password management system) per ridurre l'affaticamento da password.
